In the matter of Roberto Rios and Alberto Contreras. It is not before the Committee yet. I am hoping it is brought forward soon. Mr. Roberto Rios is the Superintendent / Principal of a very small district of 1 school with less than 300 students. Although the school received around the same level of funding as surrounding schools many concerns have been brought forward about the finances. some include having the parents contribute gas money for field trips and having to do other fundraising activities. The lack of music, arts, and other programs is also concerning. I submitted to the FPPC evidence of Mr. Roberto Rios applying for extra days and then signing his request and then approving his request. Sometimes with zero information as to why he needed those days or what activity was performed for those days. Keep in mind that he authorized over \$500 a day for his own pay. I hope you can take this case soon and take action to prevent further conflict of interest.
