Just FYI, when the FPPC created a new website in 2015, the vendor ran analytics on usage and found that the most accessed pages on the website were those relevant to the Form 700. So, if you review data going back the last three months on the website traffic, consider that the results may be slightly skewed given that the Form 700 deadline for non-Section 87200 filers was extended this year to June 1st because of the pandemic. Thanks.
